

Dear Year One Parents/ Carers,

Year One will be making model 'Space Buggies'

in Design Technology. We need some boxes etc.. that you may normally recycle or throw away.

Each child needs **1 box** e.g.

OR a clean milk bottle.

or juice carton

to make the chassis (body) of

their space buggy.

Other junk modelling resources are helpful too as the children can use them to make seats and other features. We will supply the rest.

Please bring in on **Monday 17th November 2025**

See next page for examples from last year.

Many thanks, The Year One Team

The plastic is harder to cut.
