Year 3 Snowdrop Class – Half-Term Homework Projects!

We have been absolutely amazed by the wonderful half-term projects submitted by our Year 3 Snowdrop Class!

For their half-term homework, the children were given a selection of exciting activities to choose from, allowing them to explore their interests, get creative and showcase their learning in different ways.

We were delighted to see such a fantastic variety of projects, including beautiful animal sketches, imaginative nature-inspired artwork using leaves and sticks, impressive 3D volcano models and interactive science posters exploring our topic of magnetic and non-magnetic materials.

It was lovely to see how much thought, effort and creativity went into each project. The children demonstrated fantastic artistic skills, curiosity and imagination, presenting their ideas in such unique and exciting ways.

We love seeing our children take their learning beyond the classroom and use their own creativity to bring their ideas to life. Every project was special, and we are incredibly proud of all the children who took part.

A huge well done to Snowdrop Class, and a big thank you to parents and families for supporting the children with their homework projects.

Keep being creative, keep exploring and keep shining, Snowdrops!
